

Summary of the small groups from all the linguistic groups at the Pre-Synodal Meeting

We are publishing the 20 summaries from all the linguistic groups (gathered into 4 files, one for each language) and the 6 summaries from the social media groups (gathered into one file).

This collection of summaries is precious material because it presents the voice of young people, just as Pope Francis asked.

These texts favor the comprehension of the development of the reflection that took place at the Pre-Synodal Meeting.

After the presentation of the first draft from the Redaction Commission, whose work was based off of these summaries, the reflection was enriched by contributions both from the general assembly as well as from the linguistic small groups. This was then put into writing in the final document, which was then approved by the Assembly.
